

- Reliable & Versatile
- Aesthetic appeal
- Ideal for security applications

The RDC-1 is a well-concealed recessed door contact that detects and reports the irregular opening / closing of doors and windows. Hidden discreetly within the door and window frames, the RDC-1 is ideal for security applications, specifically to hide from intruders looking to disarm your security system.

The RDC-1 features a pre-inserted lithium battery that provides uninterrupted supervised security for up to 10 years, and transmits supervisory and low battery signals to check system integrity. This slim and tapered recessed door contact blends into any home décor, making your residence a more secure place without compromising its aesthetic integrity.

Features

- Monitors the opening / closing of doors and windows
- Powered by a pre-inserted long lasting battery
- Sleek, tapered design
- Simple and flexible installation
- Randomized supervision signals to check system integrity and troubleshooting
- LED serves as a fault and test mode indicator
- Low battery detection

Specifications

Frequencies	433 MHz/ 868 MHz
Power Source	3V, CR2 Lithium battery x1
Battery Life	10 years*
Operating Temperature	-10°C to 45°C
Operating Humidity	Up to 85% non-condensing
Dimensions	69mm x 39mm x 19mm (body) 22mm x 12mm (magnet)

* Note: Actual battery life may vary with product settings, operating environment and usage.
