Introducing a new class  
of fire detection  
**FIRECLASS**

03

## What is FireClass?

FireClass is a revolutionary new class of commercial fire detection products.

FireClass consists of a comprehensive range of fully approved quality products designed and manufactured in Europe.

FireClass is designed to appeal to both the end user and installer with the latest fire detection technology packaged in an easy to install, flexible solution.

A new class of fire detection designed to meet all of your needs from a single supplier.

## Comprehensive Range

FireClass provides a broad range of detection solutions. FireClass conventional fire detection products range from the low cost J408-2 2 zone panel to the expandable 24 zone J424 Panel.

These are complemented by an enviable range of conventional fire detectors and accessories focussed on providing comprehensive protection and minimum false alarms.

FireClass addressable fire detection product range includes the easily installed out of the box FC501 and the FC510 and FC520 one or two loop panels with a simple and free Graphic maps software.

FireClass addressable uses a powerful digital protocol for high reliability and flexibility in installation.

## FireClass - A New Class of Fire Detection...

### Fully Approved

In order to ensure peace of mind for both the installer and end user, FireClass products are third party approved and certified to relevant European standards. FireClass approvals go beyond the minimum requirements including, EN54 detector approval in all detection modes and the J408 and J424 Panels having EN54-2, EN54-4 and EN12094-1 approval.

### Digital Protocol

Developed originally for the harsh marine environment FireClass uses a robust digital protocol that supports various wiring configurations to simplify installation and retrofit applications often problematic for competitors protocols.

### Easy to Install

Ease of installation and engineering underpins the concept of FireClass. It runs through all the products. For example panel installation is simplified by allowing electronics to be easily removed for first fix and simple user friendly configuration software and fault finding tools speed up commissioning.

Field device installation is simplified through the flexibility of the FireClass digital protocol and other features such as the ceiling tile adaptor that can significantly speed up detector installation.

## **FireClass 500** Addressable Range

# 08

## FireClass 500 Addressable Range

A new class of Fire Detection

## FireClass 500 Addressable Range

### Advantage of simplicity

The FireClass 500 systems are simple to install and easy to use. Innovative software tools are provided to simplify all stages of a project from system design to final commissioning. The new FC501 panel is an out of the box triple circuit single loop panel featuring auto addressing and Intelli-Zone feature combining the simplicity of a conventional system with the power of the addressable technology. The Fireclass 500 system's large clear panel displays and optional real-time graphics system provide the user with accurate information of fire and related events.

### Flexible choice

A high degree of flexibility across the FireClass range makes it suitable for a variety of small to medium size applications. Three versions are available from the entry level stand alone panel with 128 addresses to the 1 or 2 loops panels, with 250 devices per loop. The ability to network (via RS485) up to 8 repeaters and up to 8 panels in a master-slave network means that a single system can monitor up to 4000 sensors /devices.

### Fully approved

In order to ensure peace of mind for both the installer and end user, FireClass products are third party approved and certified to relevant European standards. FireClass approvals go beyond the minimum requirements including EN54 approval of IP and Telecom module, EN54 detector approval in all detection modes.

### Resistance to false alarms

The range includes a high quality Optical smoke detector together with various multi sensor devices that provide the installer with the most appropriate detection technology for each type of risk. Day/Night detection modes also allow for false alarm reduction when the building is occupied.

### FireClass 501

- Low cost entry level triple circuit single loop addressable panel
- Auto addressing with Intelli-Zone feature
- Full out of the box functionality
- Versatile easy to install addressable alternative to conventional

### FireClass 500

- 1 or 2 loops panels
- Auto learn technology
- Up to 250 devices per loop
- Easy to configure
- User friendly graphical maps

### FireClass Software Console

- Graphical user interface
- View system diagnostic
- Fast and simple system configuration
- Real time visualization
- Multilevel map based on a tree structure

### FireClass FC460 and FC400 Detection

- Provides the best in class environmental and detection performance with the capability of detecting all fire types
- Range includes an Optical/Heat Multisensor and FC400 Heat/CO multi sensor.
- 360 Degree alarm, fault and isolated LED on each detector.
- Six EN54 approved modes for the Optical/Heat multi sensor.
- Optical/heat multi sensor can use different modes in day/night settings.
- All optical modes have three EN54 approved sensitivities.
- Lower lifetime cost offering an extended service life.

### Detector Bases and Accessories

- Range of standard bases, isolator bases, sounder bases and sounder/ beacon bases.
- Addressable functional bases can be programmed via a download to adjust volume, tone selection and flash rate complemented by the time saver ceiling adaptor allowing fast and easy installation.

### Call Points

- The most recognisable indoor and outdoor callpoint. Supplied with or without back box for easy installation.
- Number of accessories available.

### Addressable Modules

- Wide range of input, output and multi function modules to suit all applications.
- Universal detector module to connect two conventional circuits with detector removal monitoring and call point discrimination.
- Self powered high voltage relay that can switch mains voltage directly from a module of the FireClass loop.
- A choice of quad input/output modules designed for a variety of interfacing applications.

### Sounders and beacons

- Comprehensive range of sounders and beacons. Wide selection of sounds to match new and existing applications.
- Sounder and Beacon elements operated separately by the FireClass panel to facilitate most evacuation strategies.
- Volume, tone and flash rate can be configured by software individually or globally.

# 10

## FireClass 500 Addressable Range

A new class of Fire Detection

### FireClass 501

#### General Features

- 3 in 1 loop panel
- Up to 400mA current dynamically shared across 3 loop circuits
- Up to 128 Addresses / 32 Zones
- Easy to programme
- Out of the box, fully programmable via keypad
- Auto Addressing
- Auto Mapping with Intelli-Zone feature
- On Line Help function
- USB port dual role Host/Device to upload/download firmware, configuration, vocal messages, etc.
- Walk test function
- Loop break location
- 4000 Event Log
- On board PSTN communicator
- Optional IP board
- Up to 4 repeaters
- Fast and simple system configuration via software, also offline
- Battery/wiring calculation and customizable cables database
- Remote Real time visualization of control panel loop & zone status, etc via IP
- Easy Remote user interface with control buttons (reset, silence, evacuate)
- Multilevel map based on a tree structure
- Capability to print zone label sheet for front panel customization

#### Product Order Codes

- |                    |                                  |
|--------------------|----------------------------------|
| <b>557.200.719</b> | FC501-L Triple loop panel - 1,5A |
| <b>508.031.743</b> | FC500IP3 IP Module               |
| <b>557.200.723</b> | FC500REP Repeater                |

## FireClass 510 and FireClass 520

### General Features

- EN54 certified
- 1 or 2 loops
- Up to 250 addresses on the loop
- Automatic drift compensation
- 1 conventional zone
- 64/128 programmable software zones
- 16 programmable OC output (8 monitored)
- 1 Fire NAC output
- 1 or 3 NAC outputs, monitored, silenceable and programmable
- Fire and fault output relay
- RS485 interface: up to 8 repeaters and 4 MFI
- 4000 event log
- PSTN phone dialer and IP module

### Product Order Codes

- 557.200.721** FC510 - 1 loop panel
- 557.200.722** FC520 - 2 loop panel
- 557.200.723** FC500REP – Repeater

## FireClass 500 Panel Communication Modules

### FC500IP3 - IP Module

#### General Features

- Connects the FireClass 500 to the LAN
- Remote maintenance and programming via the IP address
- Configuration DHCP or manual
- 128-bit AES Encryption
- Can be installed inside the FireClass500 panel enclosure
- Send events to alarm receivers using SIA protocol

#### Product Order Codes

508.031.743 FC500IP3 – IP Module

### FC500MFI - Multifunctional Interface

#### General Features

- Simplified connection to fireman's interface or remote control panel
- Interface for serial printer
- Up to 4 FC500MFI per system connected through the bus RS485

#### Product Order Codes

508.031.742 FC500MFI – Multi-functional Interface

### FC500PSTN - Telecom Module

#### General Features

- Possibility of associating up to 3 voice messages for each event
- Built-in multiprotocol digital communicator: Contact ID and SIA
- 32 programmable telephone numbers
- Programming by PC via FireClass 500 Console
- Check for telephone line cutting
- Digital message recording/playback
- Built-in speaker for message playback
- Installed inside the FireClass 500 control panel cabinet

#### Product Order Codes

508.031.741 FC500PSTN – Telecom Module for FC510/FC520

## FireClass Software Console with Graphic Maps

### Overview

FC500 Software Console, the highly flexible and powerful programming tool that has been used successfully with FireClass systems since day one. FireClass 500 Graphic Maps is a client/server emergency management system and fire detection graphical user interface. The new FireClass Console software, compatible with the triple loop FC501 panel provides all benefits provided by the FireClass 500 Console with enhanced usability and even nicer graphics.

FireClass Graphic Maps is a Microsoft Windows® based graphical interface with a high resolution colour display and provides annunciation, status display incorporating the latest FireClass Technology fire detection systems.

Available for free download on [www.fireclass.net](http://www.fireclass.net) website.

### General Features

- New graphical user interface
- View system diagnostics
- Fast and simple system configuration, also offline
- Transferable user database
- Device graphic displayed
- Configuration summary report
- Real time visualization of the loop current load
- Battery/wiring calculation
- Customizable cables database
- Visualization of all the devices assigned to a single zone
- Easy to create user interface with control buttons (Reset, silence, evacuate)
- Real time visualization of control panel loop & zone status, etc.
- Multilevel map based on a tree structure
- Access device data from any pages of the map

# **FireClass** Addressable Devices Range

## FireClass 460 Addressable Detectors

The FC460 series are addressable multi-sensor fire, smoke and heat detectors, which can be implemented as several modes and sensitivities by the FireClass control panels. The FC460 series are designed and approved to EN54.

The FC460 series detectors provide the latest fire detection technology in an attractive cost effective package. The FC460 series detectors are supplied in an extremely robust and reliable fully sealed construction, which has undergone stringent environmental testing. Electrical contacts are moulded into the plastic to eliminate any movement.

### Detection Modes

The FC460 range of detectors use the FireClass digital protocol to provide robust and reliable communications to the control panel. A wide range of cable types can be used and the open topology capability of the system makes it ideal for the upgrade of older systems whilst reusing the cables to reduce cost.

Whilst the optical detector can be set to three different sensitivities and the heat detector programmed in one of three different detection modes, the photo/heat multisensor has available a total of 14 approved modes/sensitivities. The photo/heat multisensor can also, simultaneously operate as two independently addressed detectors using different modes of operation.

For sleeping risk applications the FC460PC triple multisensor will rapidly detect across the widest range of fire types including very slow smouldering fires typical of soft furnishings. By selecting resilient mode the FC460PC triple multisensor provides early detection with unrivalled levels of false alarm rejection, ideal for hotel applications.

### Installation Features

- Standard bases with multiple mounting options simplify installation.
- Unique 'park' position for commissioning and service procedures.
- Detector addressing programmed from the Service tool or FireClass control panels.
- Address flag—fixed to the base to prevent mix ups during service.
- Full range of remote installation and service tools.
- Dirty detector read-out can be viewed on the service tool or panel.

## General Features

- Multiple fire detection modes.
- FireClass digital detection algorithms.
- CO fire detection technology.
- Up to 250 detectors per loop (dependant on panel choice).
- Remote detector verification & temperature read out.
- Highly featured service tool.
- Fire and fault LED indication.
- Optional detector locking pin.
- Variety of sounder bases.
- Protected optical chamber screen.
- Robust coated electronics.
- Extended Service Life.
- EN54 and CPD approved.

### FC460PH

With its ability to detect a wide range of fires, from flaming to smouldering types, the combined optical and heat multi-sensor detector is the preferred choice for a range of applications including light industrial, retail and office environments. It operates in a number of approved modes and sensitivities that can be dynamically selected to suit different environmental conditions.

### FC460P

More benign environment where any potential fire will be slow burning can be protected using the optical detector. A choice of sensitivities gives this detector a broad range of applications.

### FC460H

Complimenting the range is the heat sensor which can operate in fixed temperature and rate-of-rise modes. It is most often used in areas where high levels of dust are present or where the environment precludes the use of smoke detectors.

### FC460PC

For life protection and when the environmental conditions are challenging, the multisensor smoke, heat and CO detector provides the ultimate in detector performance. It uses the three sensor elements in concert to accurately determine the presence of fire with false alarm rejection properties that make it the ideal choice for hotel bedrooms where steam from bathrooms is a common source of false alarms. Compatible only with FC501.

### FC400CH

The FC400CH is designed to transmit, to a FC510 / FC520 control panel, digital signals which represent status of the carbon monoxide and heat elements of the detector. Ideal for slow smouldering fires typical of soft furnishings.

## Product Order Codes

<b>516.460.501</b>	FC460PH Combined Optical and Heat Detector

## Addressable Detector Ancillaries

### General Features

- Optional conduit entry backboxes.
- Aesthetically discreet.
- Superior performance and reliability.
- Designed for rapid installation.
- Remote LED connection.
- Optional short circuit isolator in each base.
- Loop powered sounder bases.

### Product Order Codes

- 517.050.041** 4B 4" Detector Base  
**517.050.043** 4B-I 4" Isolator Base

- 516.800.710** FC430SB Sounder Base  
**516.800.757** FC430LPSB Loop Powered Sounder Base

- 516.800.758** FC430LPASB Loop Powered Sounder/Beacon Base (\*)

- 557.001.040.Y** Sounder Base White Cap

### Ceiling Tile Adapter Kit

#### Product Description

The Time Saver Ceiling Tile Adaptor is used with the 4B 4" detector base snap fit base and consists of three parts, a bezel and clamp that are fitted to the ceiling tile and a back-box that carries the detector and base assembly.

The Ceiling Tile Adaptor requires a 127mm diameter hole to be cut into the ceiling tile to allow an easy fit and flawless finish.

#### Product Order Codes

- 517.050.060** Ceiling Tile Adaptor Kit (consists of 1 x 517.050.056 and 1 x 517.050.057)  
**517.050.056** **CTA-BB** CTA Back Box  
**517.050.057** **CTA-BC** CTA Bezel and Clamp  
**517.050.058** **CTA-AP** CTA Adaptor Plate

(\*) The beacon in this product should be used for supplementary indication purposes only. In this case the device is not required to be used as a Visual Alarm Device (VAD) and EN54-23 is not relevant to its classification.

## Addressable Call Points and Ancillaries

### General Features

- Integral LED indicator for easy identification of operation.
- Surface or Flush Mounting.
- Test key facility, speeds maintenance visits.
- Optional transparent hinged cover.
- Hazardous area models available.
- IP67 Waterproof models for external applications.

### Product Order Codes

## Addressable Sounders

### General Features

- Loop powered-reduced installation costs.
- High sound output characteristics.
- Low current consumption.
- Clean lines, modern styling.
- Easy to install, low installation costs.
- Weatherproof units for outdoor use.
- Multiple tones and flash rate to suit individual requirements.
- Integral line isolator.

### Sounder Volume and Tone Control

FireClass addressable sounders provide a choice of 16 EN53 approved tones with selections to match the non-addressable sounders in the FireClass range. Tone, volume and beacon flash rates are set in software which means that either individual, zonal or global changes can be made with a single panel configuration download.

### Product Order Codes

**516.800.760** FC410LPSYR Loop Powered Symphoni Sounder Red

**516.800.761** FC410LPSYW Loop Powered Symphoni Sounder White

**516.800.763** FC410LPAVR Loop Powered Symphoni Sounder/Beacon Red (\*)

**516.800.764** FC410LPAVW Loop Powered Symphoni Sounder/Beacon White (\*)

**516.800.766** FC410LPAV Loop Powered Symphoni Sounder/Beacon Red IP65 (\*)

(\*) The beacon in this product should be used for supplementary indication purposes only. In this case the device is not required to be used as a Visual Alarm Device (VAD) and EN54-23 is not relevant to its classification.

## Addressable Ancillary Modules

### Input Modules

**555.800.701** FC410MIM Mini Contact module providing one normally open or normally closed input. Designed to be small enough to mount inside the equipment housing being monitored.

**555.800.702** FC410CIM Contact Input module providing two normally open or normally closed inputs.

**577.800.706** FC410DDM Universal interface unit allowing connection of up to two conventional detection zones with detector removal and callpoint discrimination. Loop powered or 24Vdc.

**555.800.712** FC410DIM Conventional Zone monitor interface providing a connection of one detection circuit, requires a separate 24Vdc supply.

**555.800.766** FC410BDM Beam detector interface enabling a conventional beam detector to be powered and monitored by the FireClass loop.

### Output Modules

**568.800.703** FC410RIM Relay interface module providing one volt free relay contact.

**577.800.705** FC410SNM Sounder circuit controller allowing connection of external sounders or up to 2A @ 24Vdc or to provide a monitored output contact.

**568.800.004** HVR800 High Voltage Relay unit allowing for low current mains rated switching of up to 10A @ 250Vac.

### Multi-Function Modules

**555.800.763** FC410SIO Interface with single monitored input and single volt free change over relay contact.

**555.800.765** FC410MIO Interface with three monitored inputs and two volt free change over relay contacts.

**555.800.770** FC410QMO Quad monitor output unit provides four monitored output circuits suitable for 24Vdc conventional sounders.

**555.800.771** FC410QIO Quad input/output unit provides four monitored inputs and four relay outputs.

**555.800.773** FC410QRM Quad relay module provide four relay outputs.

**555.800.769** FC410TSM Close a door in case of alarm or fault.

### Other Modules/Accessories

**545.800.704** FC410LI Loop fault line isolation interface unit.

**555.800.067** BTM800 Interface module which allows the FC410BDM to be sited away from the beam detector but still easily connected.

**517.035.007** FC470CV Ancillary cover for use with modules.

**547.004.002** DIN rail mounting bracket enabling a module mounted to the FC470CV to be DIN rail mounted.

**517.035.010** FC470DGB White plastic surface mount back box.

**557.201.303** DIN rail mounting kit for FC410MIO.

**557.201.401** FCD800 IP65 Ancillary module housing.

## Addressable Service Tool and Accessories

### General Features

- Read/Write the detector/ancillary address.
- Display temperature/CO levels and smoke obscuration.
- Programming of the LED.
- Testing the detector remote LED and control outputs.
- Perform the detector self verification test function.
- Display detector contamination level.
- Controlling ancillary outputs.
- Reading ancillary status.
- Power management options.

### Product Order Codes

| <b>516.800.923</b> | FC Service accessory kit<br>(Plastic case complete with shoulder strap and car ancillary power) |
| <b>508.032.037</b> | USB cable 5 meters Type A <-> Type A for FC501  |

## Air Sampling Unit

### General Features

- Ideal for areas where access is restricted, harsh environments and areas where a point detector would be damaged.
- Powerful Fan.
- Up to two 100m pipe runs available.
- Pipes can be individually monitored for air flow with LED bar graph.
- FireClass loop and 24Vdc connections.
- Fault monitored via the FireClass loop.
- IP65 enclosure.
- Field serviceable air filters.
- Uses standard 25mm VESDA pipe and fittings.

### Product Order Codes

<b>516.016.402</b>	ICAM IAS460 Aspirated Smoke Dual Detector common fault monitor
<b>516.016.401</b>	ICAM IAS461 Aspirated Smoke Single Detector common fault monitor
<b>516.016.303</b>	ICAM Course Filter (Per Pack of 10)

### Overview

The ICAM Air Sampling Smoke Detection System provides a flexible solution to meet the unique needs of numerous applications including industrial spaces such as cable tunnels, tamper proof and unobtrusive requirements for special accommodation, or can simply be used to replace detectors in office environments.

The ICAM system actively draws air from the protected area through sampling holes in a pipe network. Sampled air is then filtered before being analyzed by up to two FC460 Series detectors.

The ICAM system is available in two configurations:

IAS460 twin inlet pipe configuration, which can be fitted with two detectors for monitoring one or two pipe runs.

IAS461 single inlet pipe configuration, which can be fitted with one detector.

The system utilises a high performance aspirator and software configurable flow monitoring circuitry. The air flow level is displayed on a ten element bar graph that can be adjusted for high and low flow thresholds, and flow failure is reported as a device fault.

## Air Sampling Accessories

**571.270 Pipe 25mm Diameter**  
VESDA aspirating pipes, printed along its length on opposite sides at 450mm intervals. 3 m length pipes. Order in multiples of 10 lengths.

**571.121 Socket 25mm**  
Straight socket for 25mm pipe. Order in multiples of 10.

**571.122 Socket Union 25mm**  
Socket union to facilitate servicing of pipework. Order in multiples of 1.

**571.123 Bend 25mm**  
90 degree Long Radius bend. Order in multiples of 5.

**571.128 Elbow 25mm**  
45 deg elbow. Order in multiples of 5.

**571.125 End Cap 25mm**  
End cap 25mm. Order in multiples of 5.

**571.124 Equal Tee 25mm**  
Equal Tee 25mm. Order in multiples of 5.

**571.127 Pipe Clip 25mm**  
Pipe Clip 25mm. Order in multiples of 10.

**516.018.909 Socket Adaptor 25mm to 3/4"**  
Socket adaptor, imperial to metric, to extend existing systems. Order in multiples of 5.

**570.888 Solvent Cement (0.25 L Tin)**  
Solvent cement.

**571.144 Capillary Tube Conical Sample Point Assembly**  
Capillary Tube Conical Sample Point Assembly. 25mm socket adaptor + 2m capillary tube (tube colour - red).

**571.145 Capillary Tube Flush Sample Point Assembly**  
Capillary Tube Conical Sample Point Assembly. 25mm socket adaptor + 2m capillary tube (tube colour - red).

**571.148 Capillary Tube 10mm**  
Capillary Tube 10mm 10mm o/d x 30m length (tube colour - red).

**571.152 Sampling Point Label (1Reel)**  
Capillary Tube 10mm 10mm o/d x 30m length (tube colour - red).

**517.017.006 Pipe Label (1 Reel)**  
Pipe Label. Order in multiples of 100.

## Beam Detection

### FR50, FR100 and FR5000

#### General Features

- Range: Fireray100 = 50 to 100 meters - Fireray50 = 5 to 50 meters
- Area of coverage: Fireray100 up to 1500 sq; Fireray50 up to 750 sq
- Selectable sensitivity
- Self-check and automatic compensation
- Manual or Automatic Reset
- Low current consumption

# FireClass Conventional Range

## Introduction to FireClass Conventional Range

A new class of Fire Detection

### Comprehensive Range

The FireClass conventional range offers the user a choice of control panel widely known and used throughout the world, ranging from the basic J408-2 2 zone panel up to the expandable J424-8 24 zones panel.

All panels can be fitted with 1 or 2 optional extinguishment modules and are designed to provide ease of installation by allowing most of the conventional detectors to be connected to each zone.

### Full Approvals Provide Peace of Mind

In order to ensure peace of mind for both the installer and end user, FireClass products are third party approved and certified to the relevant European Standards. FireClass approvals go beyond the minimum requirements including EN54 and EN12094-1 approval. EN54 detector approval is also provided for all detectors in the FireClass range.

### Enviably Point Detector Range

The FireClass range of conventional detectors can be used in all fire risk situations, from slow smouldering fires using CO technology to the fast flaming fires using the unique High Performance Optical detector, which emulates the characteristics of the ionisation detector, without the need for radioactive components.

High Performance Optical Multisensor is a general purpose detector that can be used as an ionisation detector replacement.

Carbon Monoxide/Heat Multisensor provides a high level of protection in environments where traditional smoke detectors are unsuitable.

Point Infrared Flame detector provides a low cost solution and early detection of liquid fuel fires.

### Easy to Install

All FireClass conventional panels offer a user friendly, out-of-the box feel.

Both the J408 and J424 are easy to install and can be configured from PC or keypad.

## FireClass Conventional Range Overview

### J408

- Low cost EN54 and EN12094-1 approved introductory panel.
- Available in 2,4 and 8 zone versions.
- Extinguishing module available.
- Optional repeater available.
- Versatile easy to install enclosure.

### J424-8

- EN54 and EN12094-1 approved.
- Expandable to 24 zones.
- Extinguishing module available.
- Optional repeater available.

### FireClass 600 Series Detection

- Comprehensive low cost range of conventional detectors with advance technology.
- Combined optical/heat detector ideal for ionisation replacement.
- Advanced carbon monoxide detector.
- Solar blind infrared flame detector.

### Detector Bases and Accessories

- Detector bases and accessories.
- Range of standard bases, sounder bases and sounder/beacon bases complemented by the time saver ceiling adaptor allowing fast and easy installation.

### Call Points

- Conventional resettable manual call point.
- Large activation surface.
- Easy installation using push-fit terminals.

### Sounders and beacons

- Comprehensive range of sounders and beacons.
- Wide selection of sounds to match new and existing applications.
- Visual alarms available in the sounder/beacon range.

### Remote Indicator

- Commonly used when line of sight is not available to the detector.
- Discreet devices used to reduce the fire search time.

# 30

## FireClass Conventional Range

A new class of Fire Detection

### J408 Panels

#### General Features

- EN54 approved
- Optional extinguishment module EN 12094-1 approved
- Up to 32 devices can be connected to each zone
- Gas zone compatible with 4 – 20 mA gas detectors
- One alarm-repeat output for each input zone
- Manual call point recognition
- Signals missing detectors
- 2 supervised, silenceable, bypassable 24 V alarm output for sirens and activation
- Silenceable fault-warning output for the activation of signalling and auxiliary devices
- Supervised fire output for telephone dialler activation
- Programmable open-collector output
- Dry contact alarm-relay for the activation of auxiliary devices
- Day/Night mode
- Alarm verification time
- Programmable restoral and reset times
- Programmable from PC or keypad
- 50 event log viewed via PC
- Alarm/fault memory activated until next reset
- Command for silencing sirens
- Keypad commands require key or pin code
- Repeater available

## 600 Series Conventional Detectors

### General Features

- Unique early detection enhanced CO fire detector.
- Intelligent universal HPO smoke detector.
- Low profile, discreet and unobtrusive.
- Superior performance and reliability.
- Designed for fast, easy installation.
- Integral and remote alarm LED.
- Series of product approvals.

#### 601P

A detector ideal for use with slow burning or smouldering fires. These detectors are particularly suitable for general applications and areas where cable overheating may occur e.g. electrical services areas.

#### 601PH

A combined Smoke and Heat Detector ideal for use with slow smouldering fires or open flaming fires.

#### 601H

A combined fixed and rate of rise heat detector ideal for use where smoke detectors cannot be situated.

#### 601CH

A detector that provides very early warning for slow smouldering fires ideal for sleeping risks.

#### 601F

A detector that is ideal for protecting large open areas without sacrificing speed of response to flaming fires.

### Product Order Codes

<b>516.600.001</b>	601P Optical Smoke Detector
<b>516.600.002</b>	601PH High Performance Optical Detector
<b>516.600.003</b>	601H-R Heat Detector - Rate of Rise
<b>516.600.214</b>	611H-F Heat Detector - Fix temperature
<b>516.600.004</b>	601CH Enhanced Carbon Monoxide Detector
<b>516.600.006</b>	601F Solar Blind Infra Red Flame Detector

## Conventional Detector Ancillaries

### Standard and relay Bases

#### General Features

- Aesthetically discreet.
- Superior performance and reliability.
- Designed for rapid installation.
- Remote LED connection.

#### Product Order Codes

- 517.050.041** 4B Detector standard Base  
**508.031.751** MUB-RV 5B Relay Bases

### Ceiling Tile Adapter Kit

#### Product Description

The Time Saver Ceiling Tile Adaptor is used with the 4B 4" detector base snap fit base and consists of three parts, a bezel and clamp that are fitted to the ceiling tile and a back-box that carries the detector and base assembly.

The Ceiling Tile Adaptor requires a 127mm diameter hole to be cut into the ceiling tile to allow an easy fit and flawless finish.

#### Product Order Codes

- 517.050.060** Ceiling Tile Adaptor Kit (consists of 1 x 517.050.056 and 1 x 517.050.057)  
**517.050.056** CTA-BB CTA Back Box  
**517.050.057** CTA-BC CTA Bezel and Clamp  
**517.050.058** CTA-AP CTA Adaptor Plate

### Euro and Deck Head mounting base

#### General Features

- Provide matching backbox for ceiling mounting.
- 4 conduit entries.
- Suitable for humid environment (4B-DHM).
- Fits all 4" bases.

#### Product Order Codes

- 517.050.052** 4B-EM 4" Euro Mount  
**517.050.051** 4B-DHM Deckhead Mount  
**517.050.612** Base Accessory terminal kit (pack of 10)

### Protective Detector Cage

#### General Features

- Robust construction.
- Coated steel.
- Ideal where detectors need protection.

#### Product Order Codes

- 517.050.614** Protected Detector Cage  
**517.050.011** Protected Detectors Sounder Base Cage

## Conventional Manual Call Points and Ancillaries

### General Features

- Conventional resettable manual call point.
- EN 54-11 standard compliance.
- Large activation surface.
- Easy installation using push-fit terminals.

### Product Order Code

**514.001.171** MCP200CS – Conventional manual callpoint

## Conventional Sounders and Beacons

### General Features

- High sound output characteristics.
- Low current consumption.
- Clean lines, modern styling.
- Easy to install, low installation costs.
- IP44 protection degree.

### Product Order Codes

**576.501.071** H201 Sounder  
**576.501.072** HS201 Sounder/Beacon (\*)

(\*) The beacon in this product should be used for supplementary indication purposes only. In this case the device is not required to be used as a Visual Alarm Device (VAD) and EN54-23 is not relevant to its classification.

## Remote Indicator

### General Features

- Provides local indication of device in alarm.
- Commonly used when line of sight is not available to the detector.
- Clean and discreet finish used to reduce the fire search time.

### Product Order Codes

**540.003.006** 601 RIL Remote indicator

## FireClass Accessories

## Power Supply Units and Batteries

### General Features

- Robust metal housing.
- Twin fused outputs.
- Temperature compensated charging.
- Deep discharge protection of batteries.
- Fault relay output.
- Comprehensive LED status indication.

## Installation Accessories

### General Features Address Flag

- Provides clear identification of address.
- Colour coded.
- Flag remains on base.

### General Features Ancillary Device Address Labels

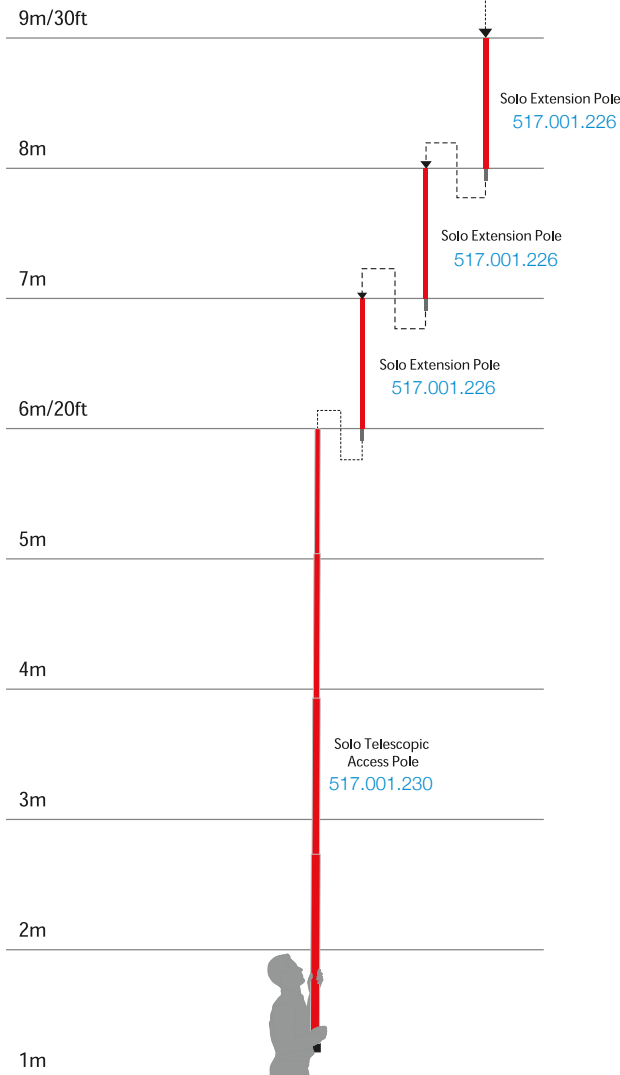

- Colour coded for easy loop identification.
- Space for Zonal Label.
- Strong adhesive backing.
