# Before You Start

Please read the following contents in this section carefully before looking up the target device models in this document.

## About This Document

HikCentral Access Control supports a wide range of access control devices, video intercom devices, recording servers, etc. To find devices and servers that are supported by HikCentral Access Control, refer to the contents in this document and search for the models you want.

The information in the list is provided by HIKVISION for general reference, absolutely without warranty and at the user's own risk. Users are strongly encouraged to validate their final edge device choice. HikCentral Access Control provides different licenses with different functions. When reviewing device support and compatibility, please take note of the License type.

If you want to learn about the supported functions of the newly compatible devices in the new HikCentral Access Control, please refer to the User Manual for more detailed instructions about these functions.

## About Firmware Version

The firmware version is the version of the software on the device.

1. For devices, if no compatible firmware version provided, it means the devices released before HikCentral Access Control V1.1 (released in September 2021) are all compatible. The devices the firmware of which released after year 2017 are recommended.
2. We will provide you the compatible firmware versions of the newly supported devices from HikCentral Access Control V1.1 (released in September 2021).
3. Please read the notes (if any) after the device model or firmware version, which indicate the special restrictions.

## Access Control Product

Make sure you have upgraded the HikCentral Access Control (both the Web Client and the Mobile Client) to V2.1.0 or later, and have upgraded the devices by the valid firmwares, or the function of opening door via bluetooth may not work properly. For the valid firmware versions, contact our technical supports.
